

On Page 44, please replace Table A and the 3 subsequent lines of text with the following:

codon	sequence
Forward primers 420G/T 416C/A	ACCAGCTTTGCCAGTTCCK (SEQ ID NO 11) TTCCGTGGGTGTGGCM (SEQ ID NO 12)
Reverse primer	GGCAGAGCGACTAAAAGCAAA (SEQ ID NO 13)

Table A: Sequence of primers used to detect Gc1F, Gc1S and Gc2 polymorphisms. K=G or T; M=C or A. 420T and 416A were attached to FAM labelled universal primer G; 420G and 416C were attached to JOE labelled universal primer C.

On page 50, please replace the third paragraph beginning with line 8, with the following substitute paragraph:

Further investigation were carried out on another locus, namely Amelogenin. The 1st round primers are as follows:-

1st round primers

Primer name	Primer sequence
Amelo X	CGACGTGGTGGATGTGCTTCTGAGCCAATGGTAAACCTGCC (SEQ ID NO 26)
Amelo Y	CGACGTGGTGGATGTGCTAGTGAGCCAATGGTAAACCTGCA (SEQ ID NO 27)
Amelo reverse	TGACGTGGCTGACCTGAGACCATAGGAAGNGTACTGGTGAGAAACA (SEQ ID NO 28)
